Azaleas

Our Azaleas are all NURSERY GROWN. Frequent transplanting and careful pruning produce fibrous roots and heavy tops which cannot be compared with collected stock, so frequently offered at bargain prices.

Are you looking ahead to the period after we have won the war? It may be several years in the future but what are you doing this year to help provide for your family then?

Our suggestion is to plant now—this year—fruit trees and small fruits that take several years to come into bearing. For example, planted this spring, a small bed of asparagus will furnish delicious meals in 1944; raspberries and blackberries will bear copiously then, too. Dwarf fruit trees planted now should begin bearing in about three years.

May we help you plan your garden?

FRUIT TREES

Ready-to-Bear Trees:

We have a fine stock of several times transplanted 5- and 6-year-old trees. Available in McIntosh, Baldwin, Fameuse and Rhode Island Greenings. These are ready to begin bearing within a year or two. Specially priced at \$2.25 each, \$20.00 per ten.

Combination Fruit Trees:

STANDARD APPLES

Grow 5 varieties of apples all on one tree! We offer 5-N-1 apple trees priced at \$2.50 each. Varieties grafted on each tree are Yellow Delicious, Double Red Delicious, Red Rome Beauty, Yellow Transparent and Stayman's Winesap.
